CARRER OBJECTIVE

I am a recent graduate in Artificial Intelligence and Machine Learning with skills in Python, SQL, and Data Analysis. Through academic projects, I have gained experience in turning complex datasets into meaningful insights. I am seeking an opportunity to apply my knowledge, work on innovative projects, and build a strong career in AI and Data Science.

SKILLS

Technical Skills : Python, HTML, CSS, SQL, Data Analysis,

Soft Skills : Problem-Solving, Communication, Attention to detail, Adaptability,
Teamwork, Collaborative

EDUCATION

New Horizon College of Engineering (NHCE), Bengaluru

Nov 2021 – May 2025

B.E, Artificial Intelligence and Machine Learning

CGPA: 7.14

PROJECTS

Neural Bot – Multi-Tenant AI Chatbot System

- Architected a multi-tenant, white-label AI chatbot platform using Node.js and PostgreSQL (pgvector), ensuring strict tenant isolation and scalable enterprise deployment.
- Implemented a Hybrid RAG system combining vector similarity search and SQL keyword fallback to improve contextual accuracy and reduce irrelevant LLM responses.
- Designed a dual-provider AI routing strategy (OpenAI GPT-4o + Groq Llama-3) to optimize inference latency, cost efficiency, and production performance.

Idea Management System

- Developed a full-stack Idea Management System using React and Node.js to automate the end-to-end lifecycle of organizational ideas with role-based workflows and RESTful APIs.
- Engineered a multi-stage workflow engine with automated triage logic, dynamic dashboards, and structured relational data management to streamline idea evaluation, budgeting, and deployment.

Heart Disease Prediction Using Machine Learning with Python

- Built a heart disease prediction model using machine learning algorithms like Logistic Regression.
- Preprocessed data with normalization, encoding, and feature selection to enhance model accuracy.
- Evaluated model performance using accuracy, precision, recall, f1-score, and confusion matrix.

EXPERIENCE

Intern, Algoleap Technologies

Jan 2026 – Present

Contributed to an enterprise Idea Management System with role-based workflows and scalable backend APIs, and designed a multi-tenant AI chatbot platform featuring intelligent ingestion, RAG-based knowledge isolation, and website-aware behavior inference.

AI - Data Quality Analyst, Rooman Technologies

Feb 2025 – May 2025

Gained hands-on experience in data cleaning, modeling, visualization, and collaboration using Python and Agile practices during an internship at Rooman Technologies.

Certifications & Courses

- **Data Analytics**, Deloitte Australia Jun 2025
- **JavaScript Essentials 1**, CISCO Apr 2024
- **Python Full Stack Web Development**, Koushalya Tech Jul 2023
